Product Quality, Reliability and Support You Expect

www.catpumps.com

When It Needs to Run, Choose Cat Pumps

Cat Pumps designs and builds products to the highest quality level for one major reason: our customers depend on our products to keep their equipment running. Every design detail is optimized for long product life and reliable performance.

Cat Pumps embraces a zero defect manufacturing philosophy. Stringent process controls result in highly repeatable processes, yielding the highest level of product reliability. The Cat Pumps commitment to quality is legendary within the industry, earning the trust from customers worldwide.

Product Ordering

Using This Catalog

The pump sections of this catalog are organized by drive type/flow rate/manifold materials (brass, 316 stainless steel, duplex stainless steel and nickel aluminum bronze). The model numbers listed represent standard pumps equipped with Buna-N seals and O-rings, except for specialty pumps, such as CO₂, TEG and portable extractors, which are fitted with unique seals for the application.

Standard Buna-N pump seals and/or O-rings can be changed by adding a suffix to the standard model number that represents the desired new seal material.

Optional Seal and O-Ring Configurations

MATERIAL CODE	DESCRIPTION	MAX. TEMPERATURE *	PUMP MODEL SUFFIX
NBR	Medium Nitrile (Buna-N) Seals and O-Rings	160° F (71° C)	—
FPM	Fluorocarbon (Viton®) Seals and O-Rings, Chemical Resistance	180° F (82° C)	.0110
EPDM	Ethylene Propylene Diene Monomer Seals and O-Rings	160° F (71° C)	.0220
HT	High-Temperature High-Pressure Seals	180° F (82° C)	.3000
STHT	High-Temperature High-Pressure Seals, Special Teflon® Low-Pressure Seals, NBR O-Rings	190° F (88° C)	.3400
	High-Temperature High-Pressure Seals, Special Teflon® Low-Pressure Seals, FPM O-Rings	190° F (88° C)	.3410
PTFE	Pure Polytetrafluoroethylene (Teflon®) Seals and Buna-N O-Rings	190° F (88° C)	.0700
	Pure Polytetrafluoroethylene (Teflon®) Seals and FPM O-Rings	200° F (93° C)	.0710
FFKM	Pure Polytetrafluoroethylene (Teflon®) Seals and Perfluoroelastomer O-Rings	200° F (93° C)	.0770
ST	Special Blend PTFE High and Low-Pressure Seals, Buna-N O-Rings	190° F (88° C)	.4400
	Special Blend PTFE High and Low-Pressure Seals, FPM O-Rings	200° F (93° C)	.4410
NBRS	Buna-N Silicone-Free Seals and O-Rings	160° F (71° C)	.6000

FPM = Fluorocarbon, EPDM = Ethylene Propylene Diene Monomer, HT = High-Temperature (EPDM Alternative), STHT = Special PTFE High-Temperature

PTFE = Pure Polytetrafluoroethylene, FFKM = Perfluoroelastomer, ST = Special PTFE, NBR = Medium Nitrile (Buna-N), NBRS = Buna-N Silicon-Free Seals and O-Rings

* See individual data sheet for each pump to verify actual maximum temperature allowed.

Viton® and Teflon® are registered trademarks of DuPont Dow Elastomers.

Example

Pump model 3535 can be changed from Buna-N to FPM. To convert pump model 3535 from Buna-N seals and O-rings to FPM (Viton®), add the suffix (.0110) to the standard pump model number (3535.0110). Use this new number when ordering the pump.

Cat Pumps configures a number of pumps for special applications and certifications such as ATEX, CO₂, TEG, Flushed, High-Temp and others. Please contact Cat Pumps directly at (763) 780-5440 for more information.

Pump Selection

Cat Pumps offers a complete line of positive displacement high-pressure pumps and systems that exceed industry expectations for reliability, availability and support. When high-pressure liquid is required, Cat Pumps is the supplier of choice for pumps, pumping systems and control accessories. Applications include CO₂ extraction, washdown, mist cooling, humidification, odor control and numerous other industry uses.

Product Performance Range

A wide range of pump options are available, including a variety of products that meet various industry certifications and directives.

- Flow: 0.13 to 240 gpm (0.49 to 908 lpm)
- Pressure: 100 to 10,000 psi (6.9 to 689 bar)
- RPM: 100 to 3,450
- Liquid Temperature: -10° to 200° F (-23° to 93° C)
- Manifold Materials: Brass, Nickel Aluminum Bronze, 304 and 316 Stainless Steel, Duplex Stainless Steel*
- Sealing Material: NBR, FPM, EPDM, FFKM, PTFE, Silicone-free*
- Drives: Electric, Engine, Hydraulic, Pneumatic

* Other materials available upon request.

Pump Features

- 1 Specially formulated, Cat Pumps exclusive high-pressure and low-pressure seals offer unmatched performance and seal life.
- 2 100% wet cup/seal design adds to service life by allowing pumped fluids to cool and lubricate the elastomers on both sides.
- 3 Stainless steel valves, seats and springs provide corrosion resistance, positive seating and long life.
- 4 Chromemoly crankshaft provides unmatched strength and surface hardness for long life.
- 5 The patented stepped piston rod with hard chrome-plated sleeve provides a durable wear surface and easy wet end servicing.
- 6 Precision-polished, solid ceramic plungers provide maximum resistance to corrosion and abrasion, extending seal life.
- 7 The high strength stainless steel plunger rods have a 360° supported crosshead providing uncompromising plunger rod alignment.
- 8 Matched oversized connecting rods are made of high-strength material with exceptional bearing quality.
- 9 Oversized ball bearings or tapered roller bearings provide extended bearing life.
- 10 High-strength, lightweight die cast aluminum crankcase with splash oil design allows operation at speeds as low as 100 RPM.

Pump Features

Plunger Pumps

(0.13–240 gpm, 100–10,000 psi)

Plunger pumps utilize spring-loaded closed and hydraulically opened inlet and discharge valves to direct flow through the pump manifold. At the beginning of the stroke, the plunger displaces the liquid in the manifold chamber, forcing the discharge valve open. When the plunger reaches the end of the stroke, the discharge valve closes. As the plunger rod begins its backward stroke, the inlet valve opens to allow more liquid into the manifold chamber, thereby keeping a smooth forward flow of liquid.

Piston Pumps

(3.0–60 gpm, 100–1,500 psi)

The design of the piston pump allows the fluid to move continually in one, smooth forward direction. This design allows greater suction capabilities and reduces the risk of cavitation provided the pump is properly primed. At the beginning of the stroke, the mechanically actuated inlet valve (and piston) will close. As the piston rod moves forward, the liquid is forced out through the discharge valves. Simultaneously, the liquid enters the pump inlet and flows in behind the inlet valve. As the piston rod begins the backward stroke, the inlet valve mechanically opens, permitting the liquid to continue its flow forward through the piston into the pumping chamber.

SF Series Pumps

(0.5–5.0 gpm, 100–2,500 psi)

In SF series pumps, both the inlet and discharge valves are spring-loaded closed and hydraulically opened, similar to plunger pumps, however, they have a flow-through ceramic plunger design. The continuous forward flow characteristic of piston pumps is utilized in conjunction with the packing design of the plunger pumps. These features give SF pumps both strong suction capabilities and higher pressure performances.

Plunger Pumps

Model 4DX10ER

DIRECT DRIVE, HOLLOW SHAFT, BRASS MANIFOLD

Electric Motor, 5/8" and 3/4", 56C Face

PUMP MODEL	MAXIMUM FLOW		MAXIMUM PRESSURE		RPM	SHAFT

Model 3535

Selecting a Drive

A variety of different drive options are offered by Cat Pumps. Most systems are belt-driven by a pulley or clutch, but there are also direct-drive options such as direct coupled, gearbox or hollow shaft direct drive.

Commonly Used Formulas

$$\text{Desired rpm} = \frac{\text{Desired gpm} \times \text{Rated rpm}}{\text{Rated gpm}}$$

$$\text{Pump Pulley}^* \times \frac{\text{Pump rpm}}{\text{Motor/Engine rpm}} = \text{Motor Pulley}^*$$

*Pitch Diameter

Selecting a Power Source

Positive displacement pumps can use a variety of different power sources, including electric motors, gas or diesel engines, hydraulic and pneumatic motors. Note: system power sources must be sized with adequate horsepower to handle the maximum system flow and pressure required.

Commonly Used Formulas

$$\text{Electric Motor Horsepower (HP)}^* = \frac{\text{gpm} \times \text{psi}}{1460}$$

$$\text{Hydraulic Torque (ft. lbs.) Required} = 3.6 \times \frac{\text{gpm} \times \text{psi}}{\text{rpm}}$$

*Standard 85% Overall Efficiency

	GPM	LPM	PSI	BAR		
67102C	100.0	378.5	1000	69	680	45 mm
152R060C	115.0	437.0	1200	83	360	100 mm
152R080C	200.0	760.0	1200	83	355	100 mm
152R100C	240.0	912.0	1000	69	270	100 mm

Model numbers ending in "C" indicate flushed cast manifold and "K" indicate flushed block manifold.

Model 67102C

High-Temperature Pumps

Model 1051.3400

.3400 SERIES, HIGH-TEMPERATURE AND INTERMITTENT RUN DRY

The “.3400” Series pumps feature specially blended seals and V-packings, expanding pump operating performance to 190° F / 88° C. This modification also allows the pump to run intermittently dry without damaging the seals. Standard plunger pumps can be fitted with these specially blended seals. Ordering this configuration requires adding .3400 to pump base model. For example, a 310 pump fitted with high temperature seals will be 310.3400. Contact Cat Pumps for additional information.

Triethylene Glycol (TEG) Pumps, 240° F

Model 310B

Liquid CO₂ Pumps

Cat Pumps liquid CO₂ series of pumps feature modifications to accommodate the unique properties of liquid CO₂. Specialty seals are used to handle low lubricity and low temperature that liquid CO₂ applications require. Pump manifolds are modified to allow higher inlet pressures and discharge pressures up to 7,000 psi (483 bar). Drive-end and manifold material combinations are available to cover a wide flow range of flow from 0.34 to 50 gpm (1.3 to 189.2 lpm).

Cat Pumps offers full technical and engineering support to properly select pumps for the specific application. Pumps are available in brass and 316 stainless steel. Cat Pumps has provided liquid CO₂ pumping solutions for over 25 years, working closely with research facilities, universities, equipment manufacturers and site locations to design and provide the best solutions. Please contact Cat Pumps for additional information.

Model 1530RSCM.CO2

CO₂ Pump Features:

- 1 Inverted manifolds provide improved passage for trapped vapor bubbles to escape through the inlet and return to the tank, avoiding potential issues caused by bubbles in the discharge line. Specially-formulated seals allow for improved operation with the low temperature and low lubricity properties of CO₂.
- 2 Drive-ends contain upgraded materials and component design to accommodate the high inlet pressures required to maintain CO₂ in a liquid state.
- 3 Ported inlet manifolds offer protection from damage caused by CO₂ leaking past the high-pressure seals. Included check valve prevents ambient air from entering the pump manifold.
- 4 Vented seal retainers offer protection against any CO₂ that escapes past the pressure seals, preventing damage to the drive-ends or pump manifolds.*
- 5 Check valves allow the escape of vapor while preventing air and humidity from entering.*

* Vented seal retainers only required on 8 frame and larger pumps.

ATEX Pumps

Under the ATEX Directive, equipment is designated by group, category and zone. Cat Pumps has been certified as ATEX 2, which also covers ATEX 3 requirements.

3560 ATEX

ATEX-certified high-pressure pumps will be specially labeled and supplied with a signed ATEX Declaration of Conformity. Pumps will be numbered with the ".ATEX2" suffix added to the standard pump model number. Contact Cat Pumps for additional information.

The following pump series comply with the ATEX directive for Group 2, Category 2, and Zones 1 and 2. This Group 2 includes Zones G (1 & 2)

Pump Series

- 3CP* Plunger Pumps
- 3 Frame* Plunger Pumps
- 5CP* Plunger Pumps
- 5 Frame* Plunger Pumps
- 7CP* Plunger Pumps
- 7 Frame* Plunger Pumps
- 8 Frame* Plunger Pumps

- 60 Frame Plunger Pumps
- 68 Frame Plunger Pumps

* Excludes models equipped with gearbox

1CX Series Compact Misting Pumps

MODEL NUMBER SELECTION CHART

Pump with Electric Motor, 1250 psi Maximum Pressure

1CX w/ Motor

PUMP SERIES	FLOW (1750 RPM)	REGULATOR	ASSEMBLE OPTION	MOTOR OPTION*	PULSE HOSE OPTION
1CX	013 = .13 gpm	R = Regulator Included	D = Pump and Motor Shipped Together- Not Assembled	1 = 8180	Blank = No Pulse Hose
	025 = .25 gpm			2 = 8182	
	050 = .50 gpm		A = Pump and Motor Assembled Together	3 = 8183	P = Pulse Hose Included
		5 = 8189			

Example: 1CX050RA2P = .5 gpm, Regulator, Assembled, 8182 Motor, Pulse Hose Included

*Motor Options:

- | | |
|--|---|
| 1. 8180—¼ hp, ODP, 115/230 V, 60 Hz, 1 ph, 1750 rpm, 12 inch leads | 3. 8183—½ hp, ODP, 115/230 V, 50 Hz, 1 ph, 1450 rpm, terminal box |
| 2. 8182—½ hp, ODP, 115/230 V, 60 Hz, 1 ph, 1750 rpm, 12 inch leads | 5. 8189—½ hp, TEFC, 115/230 V, 50/60 Hz, 1 ph, 1750 rpm, terminal box |

* HP Calculation (1CX Series only): GPM x PSI ÷ 1060

NOTE: Without pulse hose amp draw will increase as much as 2 amps depending upon pump model and discharge pressure.

1XP Series Portable Extractor Pumps

1XP Pump with AC Induction Motor

- Long service life
- Dual-frequency for world-wide use
- Constant torque

Centrifugal Pumps

1K SERIES—SUBMERSIBLE SUMP PUMPS

Stainless steel submersible sump pumps offer solutions to pumping semi-dirty water or fresh water with suspended solids up to 3/8".

Flow Range	4 to 92 gpm	Operation	Manual or Automatic
Head	5 to 61 ft	Maximum Temperature	Continuous 122° F
RPM	3450 rpm		Intermittent 140° F
Discharge Fitting	1 1/4", 1 1/2" NPT(F)	Maximum Solids Diameter	3/8"
Horsepower	1/3, 1/2, 3/4, 1, 1 1/2 HP	Material	304 Stainless Steel

2K SERIES—SUBMERSIBLE PUMPS

Stainless steel submersible pumps offer reliable pumping of freshwater or industrial waste water with suspended solids up to 2".

Flow Range	12 to 238 gpm	Operation	Manual or Automatic
Head	4 to 74 ft	Maximum Temperature	Continuous 104° F
RPM	3450 rpm		Intermittent 140° F
Discharge Fitting	2" NPT(F)	Maximum Solids Diameter	2"
Horsepower	1/2, 1, 1 1/2, 2 HP	Material	304 Stainless Steel

3K SERIES—END-SUCTION CENTRIFUGAL PUMPS, SINGLE STAGE

Stainless steel end-suction centrifugal pumps offer dependable performance and flexibility in moving high-volume liquids at low pressure. Single stage sold as either pump kit or motorized unit.

Flow Range	5 to 105 gpm	Discharge Fitting	1" NPT(F)
Head	8 to 255 ft	Shaft Seal	Mech Type 21
Minimum Inlet Pressure to Prime	Flooded	Horsepower	1/2, 1/2, 3/4, 1, 1 1/2, 2, 3 HP
RPM	1725 or 3450 rpm	Maximum Temperature	160° F
Inlet Fitting	1 1/4", 1 1/2" NPT(F)	Material	304 Stainless Steel

3K SERIES—END-SUCTION CENTRIFUGAL PUMPS, TWO STAGE (METRIC FRAME)

Stainless steel end-suction centrifugal pumps offer dependable performance and flexibility in moving high-volume liquids at low pressure. Sold as motorized unit only.

Flow Range	5 to 66 gpm	Discharge Fitting	1" NPT(F)
Head	127 to 255 ft	Shaft Seal	Mech Type 21
Minimum Inlet Pressure to Prime	Flooded	Horsepower	2, 3, 5 (IP 55 TEFC)
RPM	3450 RPM	Maximum Temperature	140° F
Inlet Fitting	1 1/4", 1 1/2" NPT(F)	Material	304 Stainless Steel

3K SERIES—END-SUCTION CENTRIFUGAL PUMPS, TWO STAGE (NEMA FRAME)

Stainless steel end-suction centrifugal pumps offer dependable performance and flexibility in moving high volume liquids at low pressure. Sold as either pump kit or motorized unit.

Flow Range	5 to 105 gpm	Discharge Fitting	1" NPT(F)
Head	3 to 255 ft	Shaft Seal	Mech Type 21
Minimum Inlet Pressure to Prime	Flooded	Horsepower	2, 3, 5
RPM	3450 RPM	Maximum Temperature	140° F
Inlet Fitting	1 1/4", 1 1/2" NPT(F)	Material	304 Stainless Steel

Centrifugal Pumps

4K SERIES—END-SUCTION CENTRIFUGAL PUMPS, SINGLE STAGE

Sold as pump kit or motorized unit.

Flow Range	5 to 633 gpm	Discharge Fitting Flange	ANSI 150 lb. – 1 ¼", 1 ½", 2", 2 ½"
Head	9 to 282 ft	Shaft Seal	Mech Type 21
Minimum Inlet Pressure to Prime	Flooded	Horsepower	1, 1 ½, 2, 3, 5, 7 ½, 10, 15, 20, 25, 30 HP
RPM	1725 or 3450 rpm	Maximum Temperature	160° F
Inlet Fitting Flange	ANSI 150 lb. – 2", 2 ½", 3"	Material	304 Stainless Steel

5K SERIES—SELF PRIMING CENTRIFUGAL PUMPS

Sold as pump kit or motorized unit.

Flow Range	2 to 18.5 gpm	Discharge Fitting	1" NPT(F)
Head	63 to 203 ft	Shaft Seal	Mech Type 21
Maximum Suction Lift	25 Feet	Horsepower	1, 2 HP
RPM	3450 rpm	Maximum Temperature	113° F
Inlet Fitting	1 ¼" NPT(F)	Material	304 Stainless Steel

6K SERIES—OPEN IMPELLER END-SUCTION CENTRIFUGAL PUMPS

Stainless steel open impeller centrifugal pumps handles suspended solids in liquid and dirty water, and handles solids up to ¾" spherical. Sold as motorized unit only.

Flow Range	25 to 290 gpm	Discharge Fitting	2" NPT(F) (with external hose barb)
Head	10 to 62 ft	Shaft Seal	Mech Type 21
Minimum Inlet Pressure to Prime	Flooded	Horsepower	1 ½, 2, 3 HP
RPM	3450 RPM	Maximum Temperature	194° F
Inlet Fitting	2", 2 ½" NPT(F)	Material	304 Stainless Steel

8K SERIES—VERTICAL MULTIPLE STAGE CENTRIFUGAL PUMPS

Stainless steel vertical multiple stage pumps designed for high volume and high ft. head clean or hot water applications. Sold as a bare pump or motorized unit (w/NEMA motor sizes).

Flow Range	3 to 607 gpm	Discharge Fitting	1 ¼" to 4" ANSI
Head	24 to 930 ft	Shaft Seal	Mechanical – Silicon Carbide / Carbon / FPM
Minimum Inlet Pressure to Prime	Flooded	Horsepower Range	½ to 60 HP
RPM	3450 RPM	Temperature Range	-22° F to 248° F
Inlet Fitting	1 ¼" to 4" ANSI	Material	304 or 316 Stainless Steel

Custom Pumping Systems

YOU DEFINE. WE DESIGN AND DELIVER.

Custom-Engineered to Meet Your Application Demands

Cat Pumps is an industry leader in providing customers with quality custom-engineered pumping systems to meet a wide range of application needs. By selecting a Cat Pumps pumping system, customers eliminate the hassle and expense of designing, multiple source buying, fabricating and testing. Our knowledgeable and helpful technical sales team assists with proper component selection as well as installation, operation and maintenance support.

All systems are designed, built and pressure tested to verify performance. To begin the quoting process, contact us at (763) 780-5440 or submit the custom system quote form at catpumps.com.

With thousands of installations running around the world, Cat Pumps is the supplier of choice for custom pumping systems.

Call or go online to start your quote today.

Custom Pumping Systems

System Configuration

With extensive experience building thousands of systems, Cat Pumps can help determine the best configuration for any application.

✓ Base

System design starts with choosing the base that best fits the application. Numerous base configurations are available to meet space, portability, sound and material demands.

- Standard • Vertically Stacked • Portable • Enclosed • Multiple Pump

✓ Power Source

A qualified technical staff with extensive experience can assist in recommending the correct product for any power source available.

- Electric • Gas • Diesel • Hydraulic • Pneumatic

✓ Drive Package

A wide variety of drive packages are available to complement any power source of choice.

- Belt • Direct-Drive • Gearbox • Flex Coupling/Bell Housing • Clutch

✓ Accessories

Choose from hundreds of high-quality genuine Cat Pumps accessories for optimum system performance and life.

- Regulator • Unloader • Relief / Pop-off Valve • Pressure Gauge
- Pulsation Dampener • Inlet Stabilizer • Inlet Filter / Strainer • Guns • Oil

Cat Pumps Advanced Control Options

Ask about the wide variety of advanced control options designed to provide maximum system performance as well as maximum system protection.

Options include:

- Variable Frequency Drives (VFD)
- PID Loop (varies speed of pump to maintain system pressure)
- Multiple Pump Systems
- Low-Pressure Seal Monitors
- Auto Shutdowns (Temperature and Low Inlet Pressure)

Other control options are available upon request.

Accessories

Demand Genuine Cat Pumps Accessories

Cat Pumps offers a wide range of high quality accessories adhering to the same exacting standards as our industry-leading pumps. Every accessory is performance tested and designed to match each pump's operating specifications. By demanding genuine Cat Pumps products, you receive the best value and lowest cost of ownership over the life of the system.

For maximum system protection, Cat Pumps recommends the use of a primary regulating device, secondary pressure relief device, and discharge pressure gauge. In addition to these system components, this catalog includes hundreds of other genuine Cat Pumps accessories. Improve system performance and protect your pumping system investment with the brand you can trust — Cat Pumps.

Maximum System Performance

Cat Pumps offers a wide range of high quality accessories adhering to the same exacting standards as our industry-leading pumps. Every accessory is performance tested and designed to match each pump's operating specifications. By demanding genuine Cat Pumps products, you receive the best value and lowest cost of ownership over the life of the system. Protect your pumping system investment with the brand you can trust — Cat Pumps.

Accessories

Typical Installation

- 1 Unloader
- 2 Regulator
- 3 Pop-Off Valve
- 4 Relief Valve
- 5 Pressure Gauge
- 6 Pulsation Dampener*
- 7 Inlet Filter
- 8 Inlet Pressure Regulator
- 9 Inlet Stabilizer
- 10 Thermal Valve
- 11 Oil Gauge/Drain Kit
- 12 Easy Start Valve

Relief Valve

Regulator

LPS Monitor

Inlet Stabilizer

- 13 Throttle Controller
- 14 LPS Monitor
- 15 Bypass Hose
- 16 Shaft Protector
- 17 Oil Cap Protector
- 18 Rails

NOTE: These illustrations show the basic elements for a typical installation of a high-pressure piston or plunger pump. **Not all components shown are required for all applications or systems.** Proper system installation, routine lubrication, monitoring and maintenance of components are basic guarantees of optimum pump performance. Cat Pumps does not assume any liability or responsibility for the design or operation of a customer's high-pressure system.

*Preferred mounting of the pulsation dampener is directly on the discharge manifold of the pump. Systems using a pressure unloader require the pulsation dampener installed down stream when the bypass is returned to the inlet of the pump and an inlet pressure regulator or check valve is used.

Discharge Accessories

Primary Pressure Control

CPC Pressure Regulators

- Cat Pumps manufactured product.
- Typically used for multiple pump, nozzle and gun applications.
- Conical design lowers minimum required bypass flow and eliminates cavitation effects, extending performance life.

STEEL NICKEL PLATED MODELS, FLOW THROUGH

TECH TIP

7001-7033, 7375, 7376 Series Regulators exclusively from Cat Pumps feature conical design delivering unmatched performance and life.

Features:

- Conical design lowers minimum bypass flow from 10%-5%, optimizing system performance
- Virtually eliminates cavitation effects across piston and seat, significantly extending life
- Compact in-line plumbing
- Low-pressure override provides smooth and stable operation without chatter.

Discharge Accessories

Primary Pressure Control

Unloaders, Trapped Pressure

- Typically used with trigger gun applications.
- Reduces load on pump and motor when in bypass.
- Easily converted into a relief valve.
- All trapped pressure unloaders can be configured as a relief valve.

TECH TIP

Regulating Unloader to Relief Valve Conversion

Pressure-Sensitive Regulating Unloaders are typically used as a primary pressure regulating device. They can be converted to a Relief Valve to be used as a secondary pressure relief device by removing the discharge check valve, O-ring and spring.

EXAMPLE:

Unloader PN	Modifications
7537	Remove parts 441, 443, 444

Converted Relief Valve PNs

7537.100 (NBR Seals)	7537.1110 (FPM Seals)
----------------------	-----------------------

Discharge Accessories

Primary or Secondary Pressure Control

Pressure Relief Valves

- Heavy duty; conveniently mounts directly into discharge line.
- Wide pressure and flow range models available.

TECH TIP

Regulator vs. Unloader Valve Product Comparison

This product comparison video from Cat Pumps offers an in-depth look at one of our most common inquiries — the difference between the pressure regulator and pressure regulating unloader valve.

www.youtube.com/watch?v=PJO8U7fq7_s&t=3s

Discharge Accessories

Secondary Pressure Control

Pop-Off Valves

- Opens when system exceeds preset pressure.
- Lightweight, compact design quickly and conveniently mounts directly into discharge line.
- Ultra compact models for portable systems.

TECH TIP

www.catpumps.com/troubleshooting-tips-pop-off-valves

Primary and Secondary Relief

Cat Pumps strongly recommends equipping each high-pressure pumping system with primary and secondary safety relief devices to safeguard against over-pressurization. These cost-effective measures help to protect the system from failure, preventing damage to expensive components and minimizing costly downtime. Check out our new Troubleshooting Tips video for critical information on why and when to use a pop-off valve and how to set their pressure properly.

Discharge Accessories

Pressure Gauges

Accurately monitors pump outlet pressure.

- Glycerine-filled for consistent and accurate pressure readings.
- Sealed stainless steel case eliminates corrosion risk.

Valve Plug Adapters

Used to add an accessory to discharge port

- Replaces one top valve plug with a ported valve plug to add a pressure gauge, pop-off valve or other accessory.
- Eliminates the need for additional plumbing on the discharge port.

Pulsation Dampener Ordering Information

For optimal performance, pulsation dampener precharge should be set accordingly:

- Rechargeable (6011–6031) should be preset at 50% of the operating pressure
- Rebuildable (701501–701610) should be preset to 75% of the operating pressure

To change the preset precharge, add a .800 to the part number and specify precharge pressure.

TECH TIP

Due to the design of positive displacement pumps, small pressure spikes are caused during each rotation. In certain operations, these spikes can cause accelerated wear or damage to the pump or downstream components. The installation of a pulsation dampener is the best practice to reduce pressure fluctuations.

Model 1530 w/o Pulsation Dampener

Min. Pressure = 1275 psi Max. Pressure = 1652 psi
OP. Pressure = 1500 psi Pressure Range = 377

Model 1530 w/ Pulsation Dampener

Min. Pressure = 1421 psi Max. Pressure = 1543 psi
OP. Pressure = 1500 psi Pressure Range = 122

- Pulsation Dampener Benefits:**
- Produces smooth, consistent flow
- Protects downstream components (e.g., regulator, unloader, relief valve)
- Reduces water hammer
- Improved performance at low rpm

Inlet Accessories

Filters

Used to filter solid particulates in water.

- Flow from inside-to-outside allows sediment to collect inside the removable filter screen.
- Removable bowl permits easy cleaning without removing filter or plumbing.

Need selection help?

If psi and nozzle gpm is known, then nozzle number can be calculated as follows:

$$\text{Nozzle number} = \text{gpm} \times \sqrt{\frac{4000}{\text{psi}}}$$

If psi and nozzle number is known, then gpm can be calculated as follows:

$$\text{gpm} = \text{nozzle number} \times \sqrt{\frac{\text{psi}}{4000}}$$

If gpm and nozzle number is known, then psi can be calculated as follows:

$$\text{psi} = \left(\frac{\text{gpm}}{\text{nozzle number}}\right)^2 \times 4000$$

A nozzle selection chart can also be found online at catpumps.com in the Literature section under Reference Documents.

Operator Controls

Vari-Nozzles

Used with downstream chemical injector to apply chemical at low pressure.

- Adjusts spray angle from 0° to 60° for cleaning flexibility.

Operator Controls

Pulse Pumps

Harsh chemicals can damage the inner components of a high-pressure pump if run through the main pumping chamber. Pulse pumps from Cat Pumps are a cost-effective solution to bypass the primary pump, injecting these solutions down-stream and preventing premature wear on parts. This allows users to run standard high-pressure pumps instead of special, more costly stainless steel pumps with chemical-resistant seals.

The same proven quality and attention to detail that customers have come to expect from Cat Pumps is built into every pulse pump chemical injector. With pressures up to 207 bar (3,000 psi) and injection rates up to 12 gph, these pulse pumps can be used on a wide variety of new or existing systems. The installation process is so simple that pumps can be retrofitted quickly in the field.

Features

- Long lasting and simple to service
- Can be used with a wide range of high-pressure pumps, from small direct-drive to large belt-driven pumps
- Easy to retrofit in the field
- Accurate and easy-to-control injection rates

- Two pulse pumps can be used on one high-pressure pump to double chemical injection rate or use two separate chemicals
- Chemical pump can be turned on and off independently from main system

Typical Applications

- Sanitizing / Disinfecting
- Pressure Wash
- Truck Mount
- Vehicle and Equipment Wash
- Surface Cleaning

High-pressure injection downstream from the system pump.

- Eliminates harsh chemicals passing through pump.
- Simple field retrofit of existing pumps.

Crankcase Oil

Genuine Cat Pumps crankcase oil provides maximum life and performance.

- Custom blend, premium grade, petroleum-based hydraulic oil for all Cat Pumps.
- Anti-wear additives protects metal-to-metal drive surfaces, extending drive life.
- High oxidative and chemical stability resists deposit formations and provides consistent fluid performance.
- Premium anti-corrosion additives offer protection in the most demanding operating environments.

Maximize life with genuine Cat Pumps Gear Lube.

- Low friction and operating temperature for low wear, extending gear box life.
- Anti-wear, anti-rust, anti-corrosion formulation to extend gearbox life.
- Excellent oxidation and thermal stability extends fluid life.
- Used on all Cat Pumps gearbox pumps except 3CP1120G, 3CP1211G and 3CP1221G (crankcase oil is used instead of Gear Lube).

Lubrication Accessories

Anti-Seize and Sealants

Sealant and anti-seize ensure proper pump operation.

- Anti-Seize protects metal-to-metal surfaces from galling, seizing, friction and wear.
- Sealant is used to fill between mating surfaces within the manifold.

Pump Protector

The Ultimate Protection for Long-Term Storage of Pressure Washer Pumps.

The best solution: use specially formulated Pump Protector from Cat Pumps to protect your pressure washer pump from freezing, corrosion, mineral deposits and premature wear. Recommended for use with all pressure washers, Pump Protector adds lubrication to pistons, valves and seals to prevent sticking.

PART NUMBER	CAPACITY	PUMP MODELS
-------------	----------	-------------

PUMP PROTECTOR

How to Order: Order part number 6208 for a case of six bottles; 12 fluid ounces (355 ml) each

CHECK OUT

Cat Pumps Pressure Washer Pump Protector

Pressure washer pumps can be adversely affected during long-term storage, especially in cold temperatures. Cat Pumps specially formulates its Pump Protector to protect pressure washer pumps from freezing, corrosion and premature wear. Recommended for use with all pressure washers, Pump Protector adds lubrication to plungers, valves and seals to prevent sticking. There is no better way to protect a pump and safeguard your customers' investments.

Pump Accessories

Oil Drain/Level Gauge Kits

Easily monitor crankcase oil level at-a-glance and improve pump maintenance.

- Conveniently monitor oil when existing bubble gauge is obscured.
- Oil drain kit can be mounted at desired location for easy maintenance.

MODEL	USED ON PUMP MODELS
OIL LEVEL GAUGE	
76144	Piston pumps: 2520 through 6041 Plunger pumps: 2510 thru 6861K. EXCEPT 35 and 38 Frame series
OIL LEVEL GAUGE W/DRAIN KIT	
76334	All Piston and Plunger pumps and 66DX, EXCEPT Plunger pumps 2SF, 2SFX, 4DX, 4DNX, 4SP, 4SPX and 5SP series
76074	All stainless steel or nickel aluminum bronze pumps, EXCEPT Plunger pumps 2SF, 2SFX, 4DX, 4DNX, 4SP, 4SPX, 5SP and 66DX series
DRAIN KITS	
34314	Piston pumps: 6020 thru 6041 Plunger pumps: 3501 thru 3570, 3801HS thru 3841KHS, 6747 thru 6775 and 6801 thru 6861K
34334	All piston and plunger pumps and 66DX, EXCEPT plunger pumps 2SF, 2SFX, 4DX, 4DNX, 4SP, 4SPX and 5SP series
990394	Plunger pumps: 2SF, 2SFX, 4DX, 4DNX, 4SP, 4SPX and 5SP series

Protectors – Shaft and Oil Cap

Safety devices to eliminate exposure to rotating pump shaft and to minimize water leakage into pump.

- Shaft protector not included with pump unless otherwise noted.
- Oil cap protector not included with pump except 35/38 series pumps.

NEMA Mounting Components

Bell Housing and Flexible Coupling

Compact direct mounting to hydraulic or electric motors reducing space requirements.

- Coupling assembly includes metric and standard coupling halves, spyder and keys.
- Special urethane flexible spyder designed for extended life with high temperature and high rpm.
- Used with standard NEMA electric motors.

Need selection help?

Q. How can I find the rpm needed to get specific gpm I want?

$$A. \text{Desired rpm} = \frac{\text{Desired gpm} \times \text{Rated rpm}}{\text{Rated gpm}}$$

Q. I have to run my pump at a certain rpm. How do I figure the gpm I'll get?

$$A. \text{Desired gpm} = \frac{\text{Desired rpm} \times \text{Rated gpm}}{\text{Rated rpm}}$$

Q. Is there a simple way to find the approximate horsepower I'll need to run the pump?

A. Electric Brake Horsepower (Standard 85% Mech. Efficiency)

$$\text{Required hp}^* = \frac{\text{gpm} \times \text{psi}}{1460}$$

Q. What size motor pulley should I use?

$$A. \text{Pump Pulley (Outer Diameter)} \times \frac{\text{Pump rpm}}{\text{Motor/Engine rpm}}$$

*Consult Engine Manufacturer

Motor Options

"C" Face, 60 Hz

Provides easily-assembled pump and motor units.

- Motors from Marathon Electric, WorldWide Electric and WEG.
- Contact Cat Pumps for additional motor options, like IEC, 50 Hz, RPM options, EXP and more.

* Prior to Department of Energy (DOE) EERE-2020-BT-TP-0011, motor was name plate-rated 208-230 Volts.

Drive Flexibility

Motors can be sold separately or with a pump as an assembled unit.

Motor-Driven Applications

- Pressure Washers
- Industrial High-Pressure Power Units
- Self-Serve Car Wash
- Car Wash Prep Units
- Washdown Systems
- Misting/Cooling/Fogging System
- Salt Water Desalination/SWRO

New Products and Updates

Cat Pumps continues to build on its market leading position with the introduction of new products. Every new product is built with the same winning business philosophy: manufacture the longest-lasting most dependable products and back them with availability from stock. Contact us to learn why customers worldwide trust Cat Pumps to keep their equipment running.

MODEL 1731 STAINLESS STEEL DIRECT-DRIVE PLUNGER PUMP

1731

The Model 1731 direct-driven stainless steel triplex pump is capable of achieving an unequalled 15.8 gpm at 1,500 psi. With a bell housing, the Model 1731 easily attaches to a "C" face motor (1750 rpm), allowing for a space-saving footprint.

Max Flow:	15.8 gpm / 60 lpm	
Max Pressure:	1500 psi / 103 bar	
Max RPM:	1750	• Salt and Brackish Water Desalination (SWRO)
Inlet Ports (2):	1" NPT(F)	• Leachate Treatment
Discharge Ports (2):	¾" NPT(F)	• Gas Turbine Cooling

NEW 7CP SERIES PUMP MODELS FOR 8 GPM AT 3,500 PSI

7CP6185CS (BELT-DRIVE); 7CP6165CSG1/7CP6165CSG118 (DIRECT-DRIVE)

Expansion and refinement of our existing 7CP series pumps have led to the development of three new pump models capable of 8 gpm at 3,500 psi to meet demanding mobile trailer pressure washing needs. Model 7CP6185CS is belt-driven, while the Model 7CP6165CSG1 pairs to an engine with a 1" horizontal shaft, and Model 7CP6165CSG118 mates with a 1 ½" shaft.

Max Flow:	8 gpm / 30.3 lpm	
Max Pressure:	3500 psi / 241 bar	
Max RPM (Belt-Drive):	1320	• Mobile Pressure Wash
Max RPM (Direct-Drive)	3265	• Water Jetting
Inlet Ports (2):	¾" NPT(F)	• Hydro Excavating
Discharge Ports (2):	½" NPT(F)	

5CP4100CSS SERIES MODULAR UNLOADERS

7865/7866/7867

By building on the simplicity and strength of our existing modular unloaders, Cat Pumps engineers have created an unloader design to match up with our 5CP4100CSS Series Pumps, and meet the demands of our customer's high-pressure application needs. Model 7865 features a 2.1 mm orifice chemical injector, and Model 7866 has a 1.8 mm orifice. For applications where an injector is not required, model 7867 includes a standard discharge fitting.

Flow Range:	0.5–6.0 gpm / 1.9–23 lpm
Pressure Range:	100–4000 psi / 6.9–276 bar
Maximum Temperature:	160° F / 71° C
Inlet Port (1):	½" NPT(F)
Outlet Port (1):	¾" NPT (M)
Bypass Port:	Built-in Channel
Dimensions:	4.12 x 1.75 x 7.00" / 105 x 44 x 178 mm

TROUBLESHOOTING TIPS

Pop-Off Valves:
Their function and proper pressure setting.

Pop-off valves provide backup protection as a secondary pressure relief valve to ensure complete pressure relief for maximum pump and system protection. See our pop-off valve Troubleshooting Tips video for useful information on why and when to use pop-off valves and how to set pressure properly.

www.catpumps.com/troubleshooting-tips-pop-off-valves

35-FRAME SEAL REPLACEMENT TOOL

Easily Remove and Install Oil Seals on 35-Frame Triplex Pumps

The typical method of replacing crankcase oil seals is complicated and involves removing the two bearing covers, the crankshaft and bearings, and the plunger rod and connecting rod assemblies before finally removing the oil seals. This can be incredibly time-consuming. Check out the new replacement tool that allows replacement of 35-frame oil seals in a fraction of the time with much less effort.

TECH TIP

www.youtube.com/watch?v=eL09-JanVoY

Pump Rotation: Forward rotation is recommended to allow optimum lubrication of the drive end.

Note: If your installation does not allow forward rotation, reverse rotation is acceptable if the crankcase oil level is filled slightly above the red dot in the oil gauge, ensuring adequate lubrication.

Cat Pumps Resources On-Demand

Take advantage of the many support options Cat Pumps offers its distributors, OEMs and end users. From live service and support to 24/7 online information and materials, customers can get help they need, when they need it.

✓ All-New catpumps.com

Answers to your questions can be just a click away. Get up-to-date product information, service documents and videos, pump and system configuration tools, and more!

- A blog to keep you updated on the latest Cat Pumps news and developments
- A new mobile-friendly platform, ensuring the best experience on any device
- Upgraded worldwide distributor search engine offers faster, more customizable results

✓ Product, Application & Service Literature

Complete catalogs of pumps, accessories and systems are available in print and online on our website. Sales literature includes the following items:

- Sell Sheets and brochures for specific markets and products
- Design guides for high-pressure systems and flush-style pumps
- Technical Bulletins

✓ Training Videos

Informative “Whiteboard Sessions” videos cover a variety of technical topics in short and easy-to-comprehend lessons conducted by Cat Pumps engineering.

Find them at www.catpumps.com/whiteboard-sessions and on the Cat Pumps YouTube channel.

✓ Service Videos

Learn how to service seal and valve kits in these authorized Cat Pumps videos, hosted on the Cat Pumps YouTube channel and website.

Find them at these links:

✓ Live Industry-Leading Service & Support

Cat Pumps knowledgeable and experienced customer service team provides assistance with order information, as well as technical support in product selection, installation, maintenance, pump repair and general system troubleshooting.

Live Support is available M–F, 8:00 a.m. to 5:00 p.m. CST at (763) 780-5440.

Customer Care: orders@catpumps.com | Tech Support: techsupport@catpumps.com

Customer Service — Another Cat Pumps Difference

When customers do business with Cat Pumps, they benefit not only from long-lasting dependable products, but also from excellent customer service and support. Cat Pumps customers enjoy the following benefits:

- 98.68% order fill rate, supported by world-class inventory management system
- 99.98% shipping accuracy, which means customers receive what they ordered
- Worldwide distribution network stocking genuine Cat Pumps products and parts
- Industry-leading customer service with “live” support, from phone operators to Technical Services
- Experienced staff on call to assist with inquiries, from designing power units to system troubleshooting
- “Account Access” on-line portal provides 24/7 access to registered customers to enter purchase orders, receive up-to-date pricing, and track orders. Contact Cat Pumps for more information.
- Email sales@catpumps.com for fast response to questions and requests or call (763) 780-5440

Sales and service support is provided by highly qualified distribution network covering the U.S., Canada, and Mexico. Cat Pumps has an international presence with sales offices in the U.K., Belgium and Germany, as well as a worldwide distribution channel.
